

Wireless Pressure Meter

General Description

The wireless pressure meter measures pressure and transmits the pressure measurement to The portal. This solution combines a standard pressure transducer interfaced to a wireless radio.

- Measure pressure with 50 or 300 PSIG transducers (others available upon request).
- Measure non-caustic liquid or vapor pressures.
- Pressure transducer is NEMA 4X (IP66), CE rated.

Online wireless

sensor monitoring and notification system to configure sensors, view data and set alerts via SMS text and email.

Principle of Operation

By connecting the wireless pressure meter to a pressurized gas, liquid or vapor supply line, it can measure the pressure within the line and send data to the Online Sensor Monitoring and Notification System. The data is stored in the online system and can be reviewed and exported as a data sheet or graph. User customization allows you to set notifications and alerts from the system so you can know immediately if pressure is above or below an optimal range.

Example Applications

- Compressors/Compressed Air Lines
- · Water Supply Lines
- Pumping Systems
- Irrigations System Pressure
- Industrial Process Monitoring
- Trash Compaction Equipment

Options

Commercial Grade Sensors

Commercial grade sensors are designed for applications in ordinary environments (normal room temperature, humidity and atmospheric pressure). Do not use these sensors under the following conditions as these factors can deteriorate the product characteristics and cause failures and burn-out.

- Corrosive gas or deoxidizing gas chlorine gas, hydrogen sulfide gas, ammonia gas, sulfuric acid gas, nitric oxides gas, etc.).
- Volatile or flammable gas.
- Dusty conditions.
- Under low or high pressure.
- · Wet or excessively humid locations.
- Places with salt water, oils chemical liquids or organic solvents.
- · Where there are excessively strong vibrations.
- · Other places where similar hazardous conditions exist.

Use these products within the specified temperature range. Higher temperature may cause deterioration of the characteristics or the material quality.

Industrial Grade Sensors - Type 1, 2, 4, 4X, 12 and 13 NEMA Rated Enclosure

Industrial sensors are enclosed in reliable, weatherproof NEMA rated enclosures. Our NEMA rated enclosures are constructed for both indoor or outdoor use and protect the sensor circuitry against the ingress of solid foreign objects like dust as well as the damaging effects of water (rain, sleet, snow, splashing water, and hose directed water).

- · Safe from falling dirt.
- Protects against wind-blown dust.
- · Protects against rain, sleet, snow, splashing water, and hose directed water
- Increased level of corrosion resistance
- · Will remain undamaged by ice formation on the enclosure
